PROFESSIONAL SUMMARY

Full Stack Developer with over 5 years of hands-on software development experience (8+ years total professional experience including IT and network administration) designing, developing, and maintaining scalable enterprise web applications. Strong expertise in PHP, Laravel, Angular, Next.js, Node.js, and RESTful API development. Proven track record of independently owning the complete development lifecycle of multiple enterprise applications, deploying and managing applications on Microsoft Azure, and ensuring application quality through unit testing and security testing. Experienced in database design (MySQL, MSSQL, PostgreSQL), performance optimization, and Agile delivery.

TECHNICAL SKILLS

Frontend: Angular, Next.js, React, HTML, CSS, JavaScript, TypeScript, jQuery, Ajax

Backend: PHP, Laravel, Yii, Node.js, RESTful APIs

Databases: MySQL, MSSQL, PostgreSQL

Cloud & Deployment: Microsoft Azure (application deployment, configuration & monitoring)

Testing: Unit Testing, Security Testing, Manual/Functional Testing

AI-Assisted Development: Using AI coding tools to accelerate frontend development (e.g., LMS built on Next.js)

Tools & Methodologies: Git, Agile, DevOps, Postman, MySQL Workbench

Operating Systems: Windows, Linux

PROFESSIONAL EXPERIENCE — Total: 8+ Years (Software Development: 5+ Years)

Software Developer / Full Stack Developer

Sept 2022 – Present (3 yrs 10 mos)

Mantle Solutions Pvt Ltd, Lulu Cyber Tower-2, Infopark, Ernakulam

- Independently own full-stack development, enhancement, and support for two parallel enterprise products: the Tenant Service Portal (Angular frontend, Node.js backend) and a Learning Management System - LMS (Next.js frontend, Node.js backend), covering requirements analysis, design, coding, testing, deployment, and post-release support for both.
- Built the LMS frontend entirely using AI-assisted development tools, accelerating delivery timelines while maintaining code quality and consistency.
- Deploy, configure, and maintain the application on Microsoft Azure, managing cloud resources, environment configuration, and application monitoring for high availability.
- Perform unit testing on application modules to validate functionality, catch regressions early, and improve overall code reliability.
- Conduct security testing to identify vulnerabilities and implement remediation aligned with application security best practices.
- Develop and maintain web applications using PHP, Angular, and Node.js.
- Design and implement RESTful APIs for frontend and backend integration.
- Maintain, enhance, and debug existing PHP and Angular-based software applications, ensuring performance, quality, and responsiveness.
- Develop and maintain SQL and MSSQL databases, including writing and optimizing SQL queries.
- Troubleshoot and resolve software-related issues in a timely manner; optimize applications for maximum speed and scalability.

IT Application Executive

April 2021 – Aug 2022 (1 yr 5 mos)

Lulu Group India, Edapally, Ernakulam

- Developed and maintained web applications using PHP and MySQL.
- Collaborated with product managers and designers to implement new features.
- Led a project to redesign the company's internal applications.
- Monitored application performance and uptime; handled post-deployment issues.
- Identified and fixed bugs and performance issues in the application.
- Ensured applications worked well across various devices and screen sizes.
- Developed and managed internal applications according to user requirements.

Jr. Network Engineer

April 2019 – March 2021 (2 yrs)

Caritas Hospital, Thellakom P.O., Kottayam

- Developed and maintained web applications using .NET and MSSQL.
- Installed HIMS (Hospital Information Management System) and provided end-user support.
- Performed system assembling and configuration.
- Planned and recommended network hardware, systems management software, and design.
- Configured and maintained routers, switches, and network systems, including wireless and VoIP.
- Performed network systems tuning, troubleshooting, and improvement recommendations.

Jr. System Administrator

April 2018 – March 2019 (1 yr)

Soften Technologies, Kadavanthara, Ernakulam

- Configured, monitored, implemented, and troubleshot network devices.
- Resolved network hardware and software related issues.
- Installed, configured, and maintained network and data communications equipment and software.

EDUCATION

Bachelor of Computer Application (BCA)

Ettumanoorappan College, Ettumanoor — Mahatma Gandhi University, 2015 – 2018

CERTIFICATIONS

CCNA & RedHat — Soften Technologies, Ernakulam, 2018 – 2019

KEY ACHIEVEMENTS

- Designed and developed RESTful APIs for various frontend and backend applications.
- Delivered two enterprise products end-to-end (Tenant Service Portal and LMS), covering frontend, backend, and software testing, as the sole owner of both projects.
- Deployed and managed application infrastructure on Microsoft Azure, improving scalability and reliability of the hosted application.
- Strengthened application quality and security posture through consistent unit testing and security testing practices.
- Collaborated with colleagues on network infrastructure improvements to increase quality, reliability, and cost efficiency.
- Proficient across Windows and Linux operating systems for troubleshooting and configuration.
